Epidemiologic Notes and Reports

Pneumocystis Pneumonia — Los Angeles

In the period October 1980-May 1981, 5 young men, all active homosexuals, were treated for biopsy-confirmed *Pneumocystis carinii* pneumonia at 3 different hospitals in Los Angeles, California. Two of the patients died. All 5 patients had laboratory-confirmed previous or current cytomegalovirus (CMV) infection and candidal mucosal infection. Case reports of these patients follow.

Le dénouement

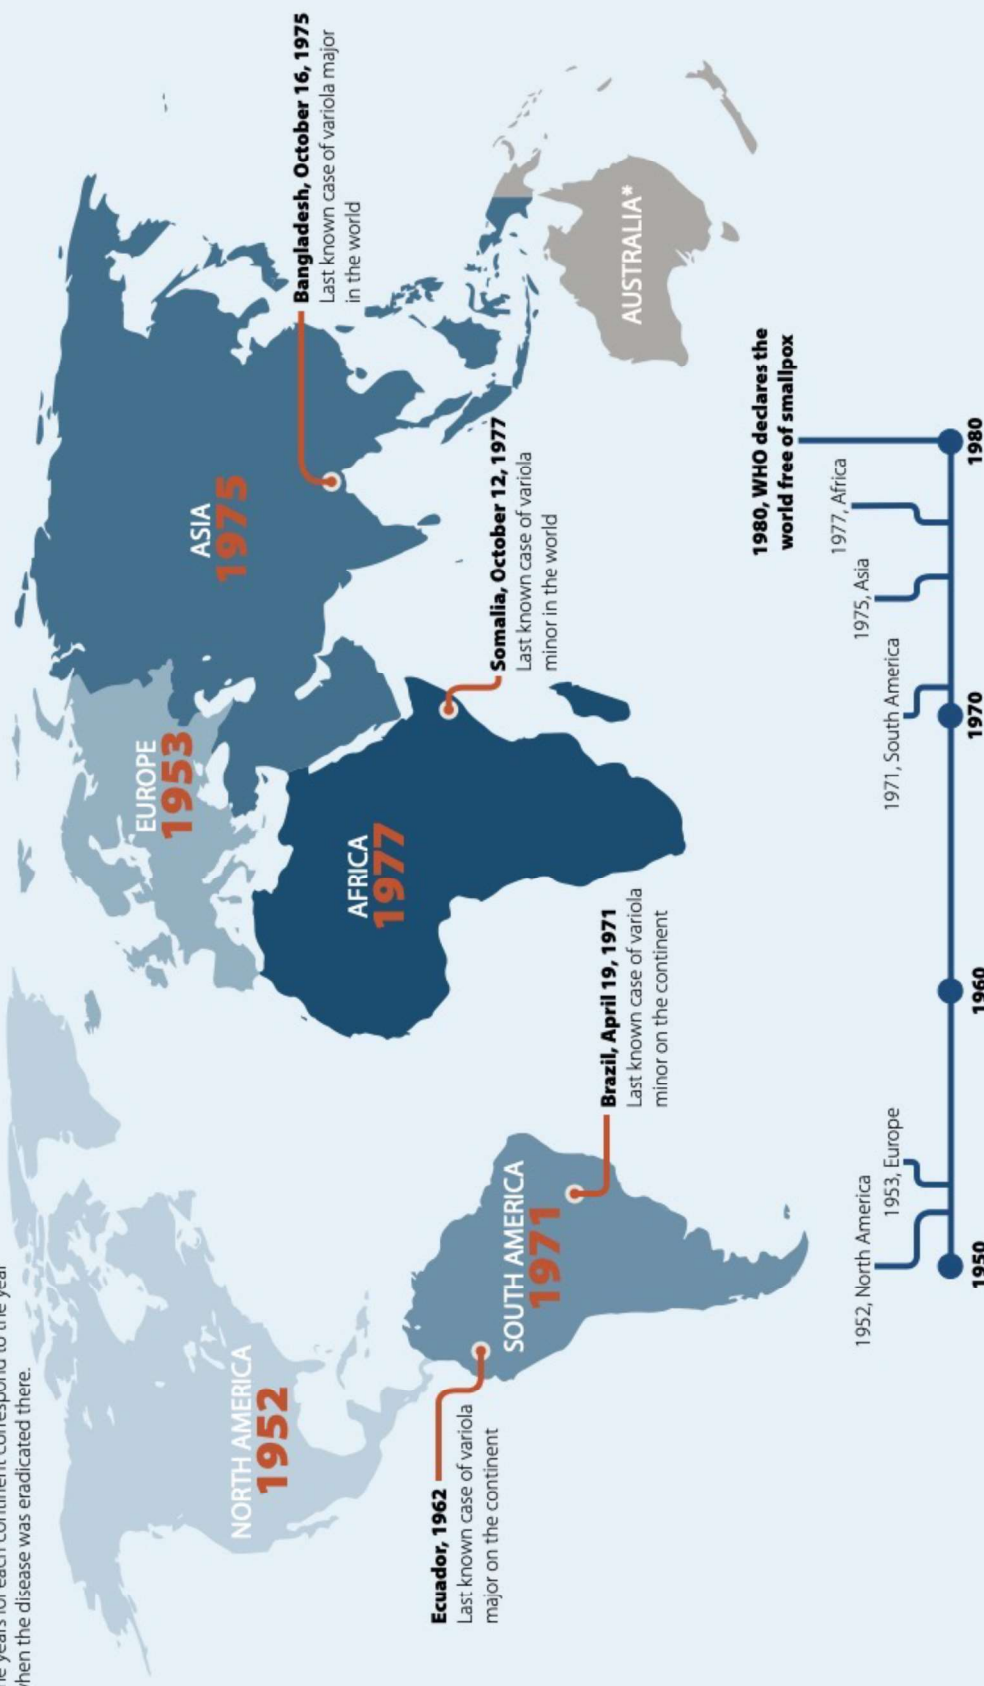

“Il avait seulement gagné d'avoir connu la peste et de s'en souvenir, d'avoir connu l'amitié et de s'en souvenir, de connaître la tendresse et de devoir un jour s'en souvenir.”
(Albert Camus, 1947)

GLOBAL SMALLPOX ERADICATION

The historically important dates highlighted in the map show countries in which the last naturally acquired cases of smallpox occurred.

The years for each continent correspond to the year when the disease was eradicated there.

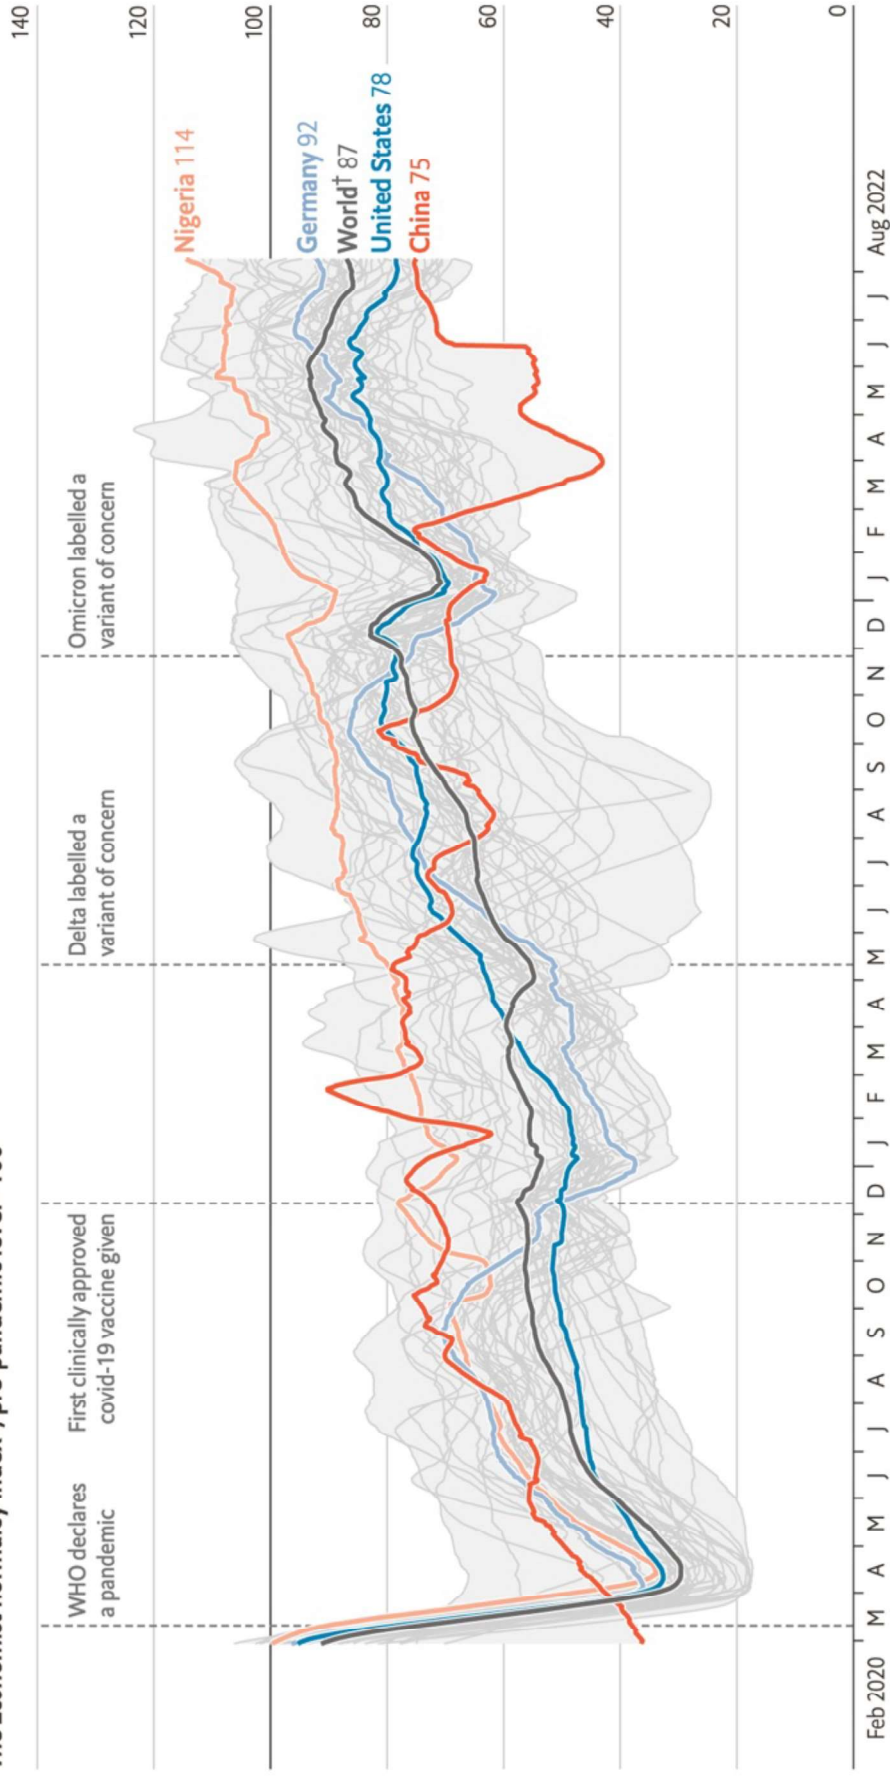

* Smallpox was never endemic (widespread) in Australia
